
4x4 club site w/games

Posted by xjc - 2008/04/04 10:13

I just cracked 1300 games online and my little dev site is starting to come together. I haven't replaced my old .asp based club site yet, but it'll happen soon..

airzonabackcountry.com

Nice looking site.

I'm a big fan of the XJ myself - I just got rid of my daily driver XJ in October. I've owned two MJ's in the last year too, they are probably my favorite Jeep...unless they decide to make the JK based pickup!

its all good.. I sold the white XJ last november. I have a 98 tj that needed a new engine (water crossing=hydrolock..) but I got it running again. everyone knows me as xjc, so I kept the name around.. if I didn't have too many vehicles I'd love to own an MJ.. maybe later in life ;)

thanks for looking at the site.

Looks pretty nice but your new games module on the games page breaks your template in Mozilla.....it scrolls right off the screen to the right.....
