Karma 1+

Yeah well I'm not really Gothic but I just think it is the perfect theme for the word Equinox. I have been planning the site since 2005, thats when I got my first website www.missionxbox.com, which is not longer alive. Then I got www.missiongamer.com. Now I have the best site, I think, I have ever made. I expect great things from it.

Do you have a website/s?

Yes i do have one running...

[Click here to check it out](#)

And i really can't await the 27th June, which will be the Opening Day for your Site :) cause i wanna see how it works with the Awards-System.

Is there a specific Reason that you already published the Basic Site and you set the 27th as a final Release of your Site ?

Oh two more Things i would like to mention.....i would add an Impressum and a Disclaimer just to be on the safe Side:) ... and i wouldn't force the Users of your Site to use Firefox instead of IE. It's the Choice of the Users which Browser they

---

use. Your Site should be compatible to at least both Browsers.

Greetings Tina123:)

Unless your name is Alex and you own this site plus bought the copyright from Firma I think you should at least give credits for this theme & Coding instead of claiming it as your own, when all you've really done is change a header.png file. I use this theme also on one of my game sites, I've edited myn but left credits to the original creator.

Your also an idiot, others will see it's the xyz theme. All you have to do is google it. They done another good theme called Carbon, why don't you go rip that if xyz don't work. Plus since when has the fireboard been yours ? Seriously, this is peoples hard work ! I've tried contacting you on your site explaining this matter and you've just banned me.

Oh well..
