
New Gaming Site

Posted by mel_belsis - 2008/06/21 02:36

Hi all,

Great Work with the PUArcade...

One of the best components around.... It works like a dream. I am new to Joomla and just created a new free gaming site...

www.paixnidoupoli.gr

I would appreciate all comments and suggestions.....

Only one question to ask...I am using CB 1.1 .. Is there any CB plug in or other module which will allow users to invite other users (even non members) to a specific game competition ?. I mean to allow the user to select a game and send an email or pm to other users with the game name (the image of the game) and a link to play.....

thx...

Keep up the good work!!!!!!
