## Error extracting nested ZIP file:

Posted by JDuc - 2008/07/23 09:46

---

I'm trying to use the Upload Archive option to upload a .zip containing 3 games. I'm assuming that this is the right place to do this?

I get this error:

Error extracting nested ZIP file: Fail to find the right signature

Try extracting the parent zip file, and then create a new one, and upload that.

If that doesn't work, try doing it with the content zip files.

Usually that error indicates some problem with one of the involved zip files.
