## PU ARCADE Searchbot

Posted by nl7at - 2008/04/13 06:09

---

Hi i am using the searchmambot from steve o meter and always when it is active and i type something and search for it comes this error:

Warning: mysql\_num\_rows(): 41 is not a valid MySQL result resource in /home/www/web112/html/nl7\_at/includes/database.php on line 403

(Mambot from steve-o-meter.com)  
here you come to my page, search is on the right side

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/04/14 00:26

---

I made a new version of the search bot

4.2.0

- \* updated to not give db error of numrows (in joomla docs as a valid function)
- \* searches game name, description and tags
- \* returns an image with the game name for better display

[CLICK HERE](#)

## Re:PU ARCADE Searchbot

Posted by Vanama - 2008/04/14 01:03

---

Thanks! But searchbot not return game images for me.

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/04/14 01:07

---

really?

thats the exact code im running and its set to take config from \$mainframe, so thats a mellon scratcher

SoM

## Re:PU ARCADE Searchbot

Posted by Vanama - 2008/04/14 01:14

---

You can test it at my site.

For example look at [http://www.zabava-online.cz/index.php?option=com\\_search&Itemid=99999999&searchword=defence&submit=Hled%C3%A1n%C3%AD&se](http://www.zabava-online.cz/index.php?option=com_search&Itemid=99999999&searchword=defence&submit=Hled%C3%A1n%C3%AD&se)

archphrase=any&ordering=newest

---

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/04/14 02:29

---

Yes, images not show. It is possible thats the wrong file, i think there no function for images in the code.

---

## Re:PU ARCADE Searchbot

Posted by zeed - 2008/04/15 15:09

---

works for me, but in line 81, in the path of images, it's writen "compoments" instead of "components" ;) thanks SOM

---

## Re:PU ARCADE Searchbot

Posted by Vanama - 2008/04/15 23:12

---

I was download searchbot 4.20 from steve site, fix bug on line 81, but this bot not work for me.

---

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/04/16 01:35

---

yes, i have the same problem, sometimes found no games, if i search for "sonic" the games are found, if i search for "cat" or "block" the games are not found.

---

## Re:PU ARCADE Searchbot

Posted by zeed - 2008/04/16 02:07

---

yep, it's true... and i think i know why... it only finds the games when you search for the tag words...

---

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/04/23 15:38

---

ok im back

had a family thing last all week

now im back, AND i lost a few of my email addresses,...

im going to look at that code now and see whats up

line 81 will be fixed for 4.21

then 4.22 when released will have the sql looked at

4.21 will be available in 5 mins

SoM

Vanama wrote:

The latest release from Your site not work :(

yes,me too

none result of games

---

## Re:PU ARCADE Searchbot

Posted by Muzzy - 2008/05/21 05:03

---

Hey SoM have you been able to figure this out? Ive just installed the latest version and it seems i have the same issue. Searches find but gives no game results.

---

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/05/21 06:29

---

I think its better you go to steve's homepage and ask him. it seems steve has no time to look here in the forum.

---

## Re:PU ARCADE Searchbot

Posted by greko - 2008/06/26 07:02

---

Hello everyone,

I have the same problem for the search function for games.

Never found no game.

In the file games.searchbot.php I commented on the row 53 to row 55 and now it works.

```
/*  
    . "\n OR a.id IN ("  
    .implode(",",$tagids)  
    .")"  
*/
```

For images modified the row 41

```
CONCAT('getCfg('live_site')."/compoments/images/',a.imagename,\'>')
```

---

in

```
CONCAT('getCfg('live_site')."/components/images/',a.imageName,'\> ')
```

---

## Re:PU ARCADE Searchbot

Posted by ruud - 2008/06/27 17:33

---

Hi greko,

Thanks for this. Its working great now:woohoo:

## Re:PU ARCADE Searchbot

Posted by Vanama - 2008/06/30 08:47

---

Thanks!

---

## Re:PU ARCADE Searchbot

Posted by mel\_belsis - 2008/07/02 02:21

---

thx, it works like a dream.....

---

## Re:PU ARCADE Searchbot

Posted by icametoplay - 2008/07/02 07:51

---

Hello All -

I have the latest version- tried this code fix - and still it does not work.

I can search tags - but since I am no longer using that feature- that doesn't really help.

The search will not return any results on Game Title.

Any ideas?

Thanks

---

## Re:PU ARCADE Searchbot

Posted by icametoplay - 2008/07/02 07:59

---

Never mind - it works.

I typed too fast and commented out the wrong thing! Thanks !!!!

---

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/07/17 11:28

---

---

ive fixed it, now tag, title and descriptions show for the search!!!

next im going to have section show as (arcade title) - (folder name)

SoM

ps im back again, what did i miss??

---

Welcome back SoM - not too much!

=====

### Re:PU ARCADE Searchbot

Posted by miro912 - 2008/07/18 02:09

---

Welcome back Steve!

But your new searchbot from yesterday dont works for me.

=====

### Re:PU ARCADE Searchbot

Posted by husooz - 2008/07/23 06:55

---

The searchbot at first page does not work. is there any new version?

=====

### Re:PU ARCADE Searchbot

Posted by steveometer - 2008/07/23 11:02

---

re-uploaded

SoM

=====

### Re:PU ARCADE Searchbot

Posted by miro912 - 2008/07/24 04:31

---

Dont work steve, thats the old file with filedate games.searchbot.php 16 July.

=====

### Re:PU ARCADE Searchbot

Posted by husooz - 2008/07/28 11:33

---

this plugin is so important but the version i download in first page does not work. i use joomla 1.0.15 and pu 2.2..

any idee?

=====

---

## Re:PU ARCADE Searchbot

Posted by nilaymedh - 2008/08/02 10:58

---

In the version uploaded 24 july 2008, bot works after commenting lines 52 and 53, so that after comment the code looks like // . " OR "

```
// . " ((a.id IN (".implode(",",$tagids).") ) AND (a.published = '1'))"
```

Seems to be some problem in searching within tags. Btw, is it possible that the game image appears besides the game title ?

=====

## Re:PU ARCADE Searchbot

## Re:PU ARCADE Searchbot

Posted by tvadmin - 2008/08/21 21:20

---

miro.... I installed on PUarcade 2.2h and joomla 1.0.15...and it works like a badass champ. You get karma!

---

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/08/21 22:40

---

thats just the same bot with tag search removed

the point is to make tag search work

SoM

---

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/08/22 16:05

---

Yes, but have a view on the images too, that are not shown with mambot ;)  
(what a newerending story ;) )

---

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/08/22 16:40

---

dunno, that same code works on my site and shows images

SoM

---

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/08/22 17:02

---

Steve, have you vergotten to update your downloads? The mambot from your downloads have the filedate 24 July 2008 and the dont work for me!

---

## Re:PU ARCADE Searchbot

I'm just joining to tell the bot installed fine also on j1.5 and svn357 and works ok, but shows the image code:

---

=====

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/08/23 00:22

---

Yes, J1,5 parsing is very different to J1.0.

You can use the very old but very good working version 3.0 from Steve's searchbot. (version without tag-search and image-show) <http://www.pragmaticutopia.com/images/fbfiles/files/games-0a361815a1728cc988ef70c35f154237.zip>

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/08/23 00:29

will double check... adding to project list for weekend

SoM

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/08/23 00:35

---

updated again

SoM

=====

## Re:PU ARCADE Searchbot

Posted by miro912 - 2008/08/23 01:09

---

oh so sorry steve, that dont work for me, what php and mysql do you using?

=====

## Re:PU ARCADE Searchbot

Posted by razor7 - 2008/09/04 21:47

---

maybe if you add the last slash of the img tag?

Best regards!

=====

## Re:PU ARCADE Searchbot

Posted by mucha0815 - 2008/09/05 10:13

---

Same to me, i have latest svn and j1.5

The Image doesnt show up, its showing the url instead of it

i saw a little mistake in the code, it says "compoments" instead of "components", i added the missing slash at the end of the image with no changes

=====

---

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/09/05 10:31

---

i have it working on my site, ill dig more... i guess 1and1 is enuf different

im gonna need professional coding for another project, maybe i can get them to look at my search bot

SoM

=====

## Re:PU ARCADE Searchbot

Posted by Bombe - 2008/09/14 14:37

---

On j1.5.6 its not showing the image.

The image output is a text: "".

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/09/24 02:48

---

I posted the new version of the game search bot

it works perfect now

i seperated the searches like this

Search Tags and get an array of game id's  
Search description and title and get array of gid  
get results where the game id is in the combined 2 arrays

it works

and i fixed the image tag

SoM

=====

## Re:PU ARCADE Searchbot

Posted by adroussel - 2008/09/24 03:09

---

Good!

Hi Steve,

Any chance to see a j1.5 conversion? :)

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/09/24 08:14

---

i have yet to even try 1.5

---

i'm going to need help migrating my site over i think

i shouldn't be scared

SoM

=====

## Re:PU ARCADE Searchbot

Posted by ruud - 2008/09/24 12:44

---

Steve,

Realy, realy sorry! Still not see the image, only tekstlink :huh:

=====

## Re:PU ARCADE Searchbot

Posted by steveometer - 2008/09/24 15:39

---

maybe Joomla 1.5 is stripping out the img tag from the sql query, it works perfect on my site...

pragma, any ideas?

btw the search is working flawlessly on my buddies 4 websites he does, and i recommend everyone get the new version... if you use tags

maybe its because i use `$mainframe->getCfg('live_site')`

SoM

=====

## Re:PU ARCADE Searchbot

Posted by Clevergame - 2008/10/31 05:39

---

i have edit the line 47

it works now in j 1.5 but its only a textlink.

```
. " CONCAT("\Flashgame".$mainframe->getCfg("")."\" ')"
```
