
PURPS 1.0 Now Generally Available

Posted by pragma - 2008/09/23 08:58

PURPS 1.0 has now been made generally available and can be found in the downloads area.

PURPS is a multi-player rock,paper,scissors type game that gives you a quick and easy way to add some great interactivity to your website. PURPS allows your users to challenge each other to a game.

It supports languages, and has a familiar control panel in the administrative area.

Versions are available for both Joomla 1.5 Native as well as Joomla 1.0.

Please give it a shot, and as always, post any issues you encounter here in the forums.

Pragma,

I translated english.ini to dutch for our dutch speaking people.

Regards,
Sportingboy

See attached file. <http://www.pragmaticutopia.com/images/fbfiles/files/dutch-cb322a49e6249f2c46359dcebe9902d3.zip>

Ok in the administrator mode, I don't see anything, only empty screens or empty buttons with no text :)

Screen Settings:

<http://users.telenet.be/geelzwart/screen/settings.jpg>

Screen Print Maintenance:

<http://users.telenet.be/geelzwart/screen/printmaintenance.jpg>

Screen Print Challenges:

<http://users.telenet.be/geelzwart/screen/printchallenges.jpg>

What should I do to solve this problem ?

Regards,
Sportingboy

I have problems with my template on joomla 1.5

was ok with no challenge but I just checked again with 3 pending challenges and my template is destroyed

it seems to be caused by the recent activity table

the template should display a right column

hope the screenshot helps

great fun btw...nice work again!

I am guessing this is caused by a language file issue. There can't be any special characters in the language files, so that could be it.

It might be showing errors that are getting suppressed. Do this to see errors:

1. Open the purps php files and comment out the line that says @error_reporting.
2. Set error reporting to maximum in Joomla configuration
3. Revisit the pages, and copy any errors that show up. Then, paste them into a forum post and reverse the above activities.

nice work as always!

Here is the German translation for frontend, backend will follow.

EDIT

Tested PURPS and made a new Translation file for Frontend.

Pragma,

I don't see any errors appearing :(

I tested it out and PU RPS seems to work only in the admin page, I only see the above screens :blink:

Tip: Can you create a drop down box to select a user for a challenge

<http://users.telenet.be/geelzwart/screen/challenge.jpg>

Nice work with PU ARCADE and PU RPS btw ;)

Greetings,
Sportingboy

I didn't make it a drop down box, because then it would be easy for bad guys to get the usernames of every person on your site. That is a security risk and everything.

In the future, I might add an "auto complete" type feature, where it will finish a name you start typing.

Also, it would be good to add a link in CB or FB so people can challenge people right from their profiles.

German language file for backend.

In admin.purps.html.php on Line 236:
" value="

There is DELETEALLCOMPLETED instead of DELETEALLPENDING

Those of you who are having trouble with PURPS, can you create new threads in the support forum about them? I am having a hard time keeping track.

New German Translation file for frontend.

Better than the last one I uploaded. http://www.pragmaticutopia.com/images/fbfiles/files/de_DE-
