
Not played Games

Posted by Tina123 - 2008/09/24 12:36

Maybe i missed it but i could nothing find about it....

is there already a Module or a CB Plugin existing for joomla 1.0 where Players see which Games they did not play yet?

I have a CB Plugin for the played Games (including the Ranks of each scored Game) but not for the "Not played Games"

Greetings Tina123 :)

This displays an unscored random game with image and high score from PUArcade 2.1.x but I have it installed on pu 2.3 and it seems to work. Kevin o connor made it.:

Thank you for the Info :) I tried this one in the Past. But this makes Loading of the Page very very Slow on my Site. I was thinking more of a specified Plugin for the Member. So when a Member logs in it shows him his unplayed Gameslist. Almost like a List when you use the "My Favorites" Module.

Greetings Tina123 :)
