## Game exists already feature

Posted by magnewi - 2008/09/26 00:53

---

I am missing a feature that tell you that the game already exists when you upload a game:)

Yes that would be very very usefull.

The larger your Site gets the more you loose the Overview.

Can`t remember how many Times Members informed me about double-installed Games :laugh:

A good error message would be good, but the arcade doesn't let you install the same SWF file twice anymore. It might say success, but it won't actually add it to the database anymore.
