
NEW VERSION: SoM CB PUa Tab

Posted by steveometer - 2008/09/26 14:44

this version has NO tables and uses 2 tabs, 1 to set config of score box and 1 to make the menuitem
the config options are limited but i will make more config this weekend (height width border colors ect)
CLICK HERE for shortcut to the download

I couldn't get the plugin to format correctly. It put a large space after the line should have ended and then cause each line to wrap in a strange fashion. I fooled around with the code but couldn't get it to look right. Other wise its a nice plugin and it calls a lot of info without many queries. Good work.

i only recently noticed that ie doesnt work right on the tab
im gonna work on it...
didnt they decide that ie is no longer supported by the internet?

Your right about IE but I was using firefox this time. It looked good on your site but not mine. Reading the code I didn't see a reason for it to do what it was doing.

Does it only works in J1.0 ?
I use J1.5.7 and get following error message:

Fatal error: Cannot redeclare class getPuaTab in
/www/htdocs/xxx/components/com_comprofiler/plugin/user/plug_cb_som_puatab/cb.som.puatab.php on line 139

dunno

i will re-upload the code to make sure that its the same version im running

i dont get why 1.5 doesnt do right, isnt that what legacy mode is supposed to do?

Re:NEW VERSION: SoM CB PUa Tab

Posted by steveometer - 2008/09/28 08:59

the code is now EXACTLY what i run on my site, and if 1.5 doesnt like it, its 1.5's fault

im installing 1.5.7 on my server and im going to build the arcade in it, then im gonna redo ALL my extentions.

i will have these by the end of the week

well, i found that if i commented out the date display it works

i need to work out some way of doing this better

i might just have to go back to a table, but still inside a div...

maybe add the text reader tags to skip reading that part...
