## WOW! [www.phatyaffle.com](http://www.phatyaffle.com)

Posted by silverado - 2008/06/11 13:49

---

Amazing site has great PU Arcade installation.

They seem to have an encryption system to mitigate cheating.

Also Tournaments, web site space, shopping and other things integrated

Phatyaffle

What a great looking site!

It does look like they've done some anti-cheat tweaking and added contests as a separate component. Pretty slick!

Hello Silverado!

This is interesting.

I can see from your older posts and questions on here, that this new beta phatyaffle.com is your site right?

So maybe you can share and tell us a little more about the anti cheating tweaks you made? Anything to do with the secure url (https) used on there? Or is this ssl encryption for virtuemart? (if so you should not use it on the whole site)?

what about that com\_tournament? is that the same one we can find on some other sports sites you tweaked? I think this might interest a lot of people in here ;)

Thanks

ps: your virtuemart is amazing! ;)

---

Yes i would really also know more about this com\_tournament :) Is there a Chance that it would be avaiable ? Damn i was just about to switch to same Template as you have a couple Weeks ago....but you have modified it a little bit from the Original :)

btw: Great Site :)

It looks to me like they are not loading the flash game directly, but through a different loader swf. I wonder if this has to do with the anti-cheat functionality.

## Re:WOW! [www.phatyaffle.com](http://www.phatyaffle.com)

Posted by silverado - 2008/06/18 15:39

Not saying it is a full proof anti-cheat, but limits people from from hacking the cache of .swf files.

Encrypted .swf game.  
Unencrypts with key/pairs from the site.  
Use of Javascript and .swf to unencrypt.

If you really wanted to use softice and other things you could break the encryption.

Second form of anti-cheat is the tournament system. Humans are responsible for saying if the game was played as said (Tournament Directors)

Third form is ELO rating system built in. If somebody starts cheating then nobody will play with them, because their ELO rating is too high.

Tournament system was developed from scratch. Was supposed to only take a month, but ended up taking 4 months to write.

Regards,

Silverado

Do you mind to share the Tournament Component ?

:)

Oh and I don't see a copy right for puarcade component you might want to fix that. stupid:angry:

=====

**Re:WOW! www.phatyaffle.com**

Posted by silverado - 2008/06/22 20:58

No, we won't be sharing the tournament component. It was a 6 month, 50k project. Anyone care to help pay for it? Didn't think so.

We have contributed a great deal of code at my expense to PUArcade. Pragma can verify. The tournament component, is completly separate and includes a banking system and other integrations...

regards.

I don't know what your thinking about your website. From what I see your selling arcade game subscriptions from a free arcade component. Now thats not a very good business in my eyes.

=====

**Re:WOW! www.phatyaffle.com**

Posted by pragma - 2008/06/24 18:33

Silverado is one of the biggest contributors to PUArcade.

I have to say he's done more for PUArcade than almost anyone else, so I think we should cut him a little slack.

If you want to be mad at someone, head over to <http://www.freegaming.de>. They took the link off of PUArcade and are distributing it as "Titan Games".

Thanks pragma,

As for selling subscriptions to PUArcade, the site is much more than that.

Tournaments, shopping, web pages, briefcase, free downloadable games, 30-50% off of retail games from Graffiti.

Guess some people didn't actually look around at to what the site has to offer.

And now for a freebie:

Red Jets

Get this Product for Free!

Go to <http://download1.phatyaffle.com> and download the game. Then sign up for a free subscription at [www.phatyaffle.com](http://www.phatyaffle.com). With your confirmed subscription you will get a coupon to use in the shop to purchase the game and key for free. When you first run the game it will ask you to login to [www.phatyaffle.com](http://www.phatyaffle.com) and it will retrieve a key for you. You now have the game for free. Completely legitimate courtesy of Phatyaffle.com and Graffiti Entertainment.

We don't mind having the copyright where appropriate. It just was kind of obtrusive to the flow of the site. We can surely put it in the FAQ or other places. Pragma, preference?

Regards,

Silverado - Main Engineer, Phatyaffle.com

The website is clearly a lot more than just another PUArcade install.

I really like phat yaffle. It has made extensive modifications to the component and provided extensive support to the PUArcade community. It really shows off what can be done with PUArcade.

What bugs me is the many thousands of web developers that profit from PUArcade and contribute NOTHING. Do you know how many radio stations, towns, etc use PUArcade on their websites? ALOT! How many of them have made any kind of contribution? Approximately 0%.

You don't have to put it anywhere, it doesn't matter to me at all.

@ OP. Why promote in the third person? If it's your site, be proud of it. No need to talk as if you're a neutral reviewer.

Don't be so hypocritical Brandon. You removed it too.
