## RPS user list

Posted by VReyes - 2008/09/30 12:00

---

Hello,

not sure if this has been ask and i could not find in the search.

but is there a way to add the User List that CB has to be integrated with RPS. so when a user wants to challenge a user they can see all member user listed to be easily selected or easy for them to copy and paste the user to the field. i think this will add more interaction for anyone they want to challenge.

also if its not hard how about a user list with like a + sign next to their user name to challenge them.

thank you,

VR

Anyone from the community able to come out with some plugins or hacks or anything so we can more easily challenge people?

There has to be a simple hack for FB where you could put a challenge button next to the PM button right?

anyone willing to integrate this?

@ Adroussel (maybe you. since i know you are great with some of the integration you created already)

thank you,

VR

i just saw this

i know the cb plugin works great for me

i will test the fb plugin

i am making a hack (not a plug) for liveuser module, but im not sure if everyone will be able to use that, i had to severly hack my copy of liveuser module to get it to work right on my (1and1) server

i think thats where the bulk of my problem comes from, is 1and1 has diff versions of everything

so look for a liveuser hack, and the 1.5.7 version of some stuff

som,

i know the CB plugin works but i was referring to the CB user/member list. i was hoping maybe we can get the RPS next to their name or anywhere in there to easily click on RPS right away instead of going to their profile.

hope i made that clear. but if that doesnt work maybe Pragmas idea to have a FB plugin.

thank you,

VR
