
PU RPS: Lang file not loaded in backend

Posted by Vanama - 2008/09/27 02:04

Hi, I have installed PU RPS, but options for this component in backend is without any strings, which should be from lang file.

In Frontend is this ok.

Where is mistake?

Thanks for answer.

I have no access ...

You do not have access to this Forum!

Thank You, but this isn't solution for this bug.
I don't know why You should not allowed for this, PU RPS is public component now ;)

maybe you are right ;)

if that was not wwhat you meant, well than you gotta wait for pragma ;)

What Joomla version are you guys using?

The 1.0 and 1.5 versions do languages differently...

I use Joomla 1.0 and everything works fine in frontend but in backend I can't see nothing...

in the file components/com_purps/purps.class.php

line 431

the following:

```
$langfile = $absolutepath . '/components/com_purps/lang/english.ini';
```

replaced by the following:

```
$langfile = $absolutepath . '/administrator/components/com_purps/english.ini';
```

enjoy ;)
