## Error when game finishes (SEO problem)

Hi,

I have installed and enabled the plug-in, I'm not suing Joomla hacks or bridges, nor JA ccelerator, but I am using teh Joomla SEO friendly urls.

When I disable the SEO urls my games scores are dispalyed, but when I turn them back on they go back to displaying an error message.

I need to keep my urls SEO friendly, and I really love the games, so I am posting to see if anyone knows a workaround for this.

Thanks in anticipation,

I'm using Joomla 1.5.6 (extra details below)
