## Do not let guests play

Posted by mufasa - 2008/10/05 05:52

---

Hi,

I do not want guests to play when the games are displayed in folders.

... this works only in 'flat game selection' only but I do not want my guests to play games at all, only to view the games, regardless of the game view.

Can you please help with this, perhaps change or add something to the code?

Thanks.

have you tried to set the right permissions for each game-folder?

"view" - everyone

"view and play" - everyone except guests...

THANK YOU  
WORKS GREAT!
