
Number of games in Newest/Popular games folders

Posted by xabarax - 2008/10/05 07:59

Hi,
i use release 2.2H, when i click on the special link for newest and popular games, i see 10 games for the newest , and 100 games for the popular ones.
I think it depends on the settings in the backend... but how can i set a different number of games for those 2 folders? i.e. i'd like to have 30 games in both them, without changing anything in the backend... even if i have to modify something in the php...
Any advice?
thanks
:)

Ok, i've found the solution by myself... ;) In cls.puarcade.php it's sufficient to change the limit of this two queries

```
}elseif ($fid == 9997){  
    $query = "SELECT  
id,numplayed,description,imagename,published,gamename,title,reverse_score,scoring>window,height,width,contentrating  
d FROM #__puarcade_games WHERE published = '1' ORDER BY numplayed DESC ".$limit;  
}elseif ($fid == 9998){  
    $query = "SELECT  
id,numplayed,description,imagename,published,gamename,title,reverse_score,scoring>window,height,width,contentrating  
d FROM #__puarcade_games WHERE published = '1' ORDER BY id DESC LIMIT 20";
```
