
plug_cb_PURPS_mystats

Posted by adroussel - 2008/09/30 08:33

added to the community downloads.

This little cb plugin displays a user stats (won lost draw & all) in a tab and PURPS icons to challenge users from their profile!

enjoy!

I guess this, added to the notifier (which I couldn't try yet) should make your PURPS interactivity setup at its best!

:silly:

try it and thanks for comments and bug reports!

PS oups sorry, wrong place, move this topic to 3rd party extentions

Great Work :)

grabbed it, changed Language and it works really nice so far!

And i can use it on my joomla 1.0 Installation :laugh:

Posted by VReyes - 2008/09/30 10:52

ok. i just checked on community download but cannot find it. i checked all 3 pgs. am i looking at the wrong place.

also is this plug for J1.5.

thanks,

VR

Edit - oops sorry i was looking in PUA. thanks i will try it.

Nice work Adroussel!

Re:plug_cb_PURPS_mystats

Posted by ruud - 2008/10/01 11:55

It works great in joomla 1.5.7 and cb 1.1 and its a very nice plugin!
Only the "View your current challenges" link is going nowhere

When I mouse over this link I see: <http://www.xxxxxx.com/test/index.php?Itemid=1000114>

When I click on it I get a white page with the tekst:
Fatal error: Unsupported operand types in /home/ruud66/public_html/test/includes/router.php on line 140

Hope this helps? :cheer:

Re:plug_cb_PURPS_mystats

Posted by pragma - 2008/10/01 12:25

Do you have a menu link for purps?

Re:plug_cb_PURPS_mystats

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/01 16:53

In the plugin parameters,
you have a PURPS Itemid field
Default is 100014 which is mine

but should be replaced by yours
I'd say MUST be replaced by yours ;)

Ruud, for you it would be 58
Vreyes, do not disable your menu items ;)

Re:plug_cb_PURPS_mystats

Posted by VReyes - 2008/10/02 09:56

I am still getting this error:

Fatal error: Unsupported operand types in /home/vreyes1/public_html/includes/router.php on line 140

I have changed the param to 89 which is my PUA comp ID in the CB plugin mgmt. i have checked also the Tab mgmt but shows no param.

I cleared out the cached in IE7 & FF3 to make sure but errors with adroussels Item ID for the URL. not sure why it is not changing.

<http://www.mygamelink.com/index.php?Itemid=100014>

using CB1.2rc2, J1.5.7, latest PUA

thank you,

VR

Re:plug_cb_PURPS_mystats

Posted by ruud - 2008/10/02 11:50

@VReyes,

I had the same problem with this. When you look in the code itself then you can see that the number does not change in there. So this must be a bug I think? When you change that number in the code itself, it works ofcourse. You can change it in components/com_comprofiler/plugin/user/plugin_cbpurpsmystats/cbpurpsmystats.php

Look for this code:

```
$purpsitemid = $params->get('purpsitemid'
```

Behind this code you can find this number and change it...

@adrussel, thanks again! ;)

/params.jpg

You must put your PURPS Itemid in there and not your PUA...

;))

Maybe that's what you meant...

Also make sure your PURPS menu Item is NOT disabled (as you mentioned before)

Ruud's advice could also do the trick...

But it shouldn't be needed...

have fun

Re:plug_cb_PURPS_mystats

Posted by VReyes - 2008/10/02 20:58

ok. i did everything the way it should be but still shows your ItemId. so i went to cpanel and change it as Ruud describe. maybe its a bug like ruud said. but i dont know.

anyways thank you both and now it is working great,

VR

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/05 06:17

hi,

maybe i am wrong but it looks like i have found a big Bug on this Plugin :(

I am running Joomla 1.0.13 and PURPS together with the CB Plugin

It seems that PURPS does not count any Challenge that has been done

I just challenged a Member a couple Minutes ago and in the Shoutbox i received the Shout "xxx has won the Challenge against xxx" and it also counted it to the Leaderboard. Then i got Re-challenged from the Member and the Pop-Up informed me about it. I clicked into the Pop-Up and made after that my Weapon-Choice. After that it showed me the Result, but just the two Pictures (my Weapon and the Members Weapon) were shown. No Text like "Draw" or "Congratulations, you won" appeared. And it didn't take the Challenge into the Challenge-History correct. It added the Challenge to the Total-Challenges, but didn't count it to Draw or Win or Loose. So the Total-Score is more than the Won, Loose and Draw together...

I found the Problem i guess it must be the CB Plugin for PURPS! If a Member makes a Challenge via the CB Plugin in another Members profile this Problem appears. If Members make their Challenges from the PURPS Component via Nickname Choice then everything works fine and Challenge gets added to the Leaderboard correctly.

So finally let's say:

Challenges in PURPS are working fine, and Challenges via Members-Profiles are not counted and broken :(

Maybe someone else who has PURPS installed might be able to check if this is the same on his Installation, please ?

Greetings Tina123

=====

Re:plug_cb_PURPS_mystats

Posted by heli07at - 2008/10/05 08:07

Just checked it out on my J1.0.15 installation - it makes no difference if I challenge a user from PURPS directly or through the CB plugin - both are being counted correct.

=====

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/05 08:07

Hi Tina,

I double checked on my site and it works with no problem, I challenged a user via the cb plugin and accepted challenge with another user. After challenge result, both got one more to 'all' the winner had one more 'won' and the loser had one more 'lost'. So won + lost + draw = all for both members

so I'd say

it's working fine here

:huh:

ps: I tested with PURPS moded for RISP shoutbox announcements (sent challenge & winner) also moded to give AUP points on contest won, I tested sending challenge from the cb plugin. I did not use the popup notifier.

Let me know when you find out
greet

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/05 10:56

Oh no :S

i am really getting confused now :(
i have disabled the CB Plugin 5 Hours ago and still i have the same Problem :(so it is not a Problem from CB Plugin or the Challenges have been started before i disabled the CB Plugin and they could use the Challenge-Button in the Members-Profiles. And maybe the Member just accepted the Challenge right now? But still the Challenge was started via the CB Plugin and that might explain the Scoring Fault?

Seems like a lot Work for me :(

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/05 17:25

Oh no

Sorry Tina... but I prefer you only have this bug ;) than everybody with this cbplugin :unsure:

well don't worry it's not so much work
if this keeps on, just make a fresh install of PURPS, install the CB plugin double check everything is fine, then the notifier, check again, and then add the shoutbox or whatever mods.

Most of the time bugs appear with human intervention.

:)

Re:plug_cb_PURPS_mystats

Posted by steveometer - 2008/10/06 11:12

works fine for me

i sent pragma an updated purps with sef and cb links, the other main thing is i added a winning percentage in the leaderboard, and had the sql sort the data by that percentage, so IF the new bit of code makes a new version, it would be nice to have a winning percentage in the cb tab

also, am i the only site that doesnt use the tabbed pane and uses all div with title? because that could be breaking the pua score tab i put out

SoM

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/06 20:24

Ok I updated the cb plug purps my stats, it now shows results in challenges like before but also in percentage (thks steve) get it from the community downloads

btw I don't think ranking the purps leaderboard on % is the best. I mean if a user only plays once and win , he would lead and then stop playing.

I think basing the ranks on 'won' would make people play more...

I'm also thinking about converting my pua contest of the month module in a new purps contest of the month... so that we can have a purps jaward medal ;)

=====

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/08 01:08

to find the Problem i made this....i deleted all Highscores and unpublished the CB Plugin for PURPS. Since yesterday afternoon the PURPS is running on my Site just together with the Pop-Up Checker. So far every Challenge gets counted correct. I will runn a few more days in this Settings, and then i will publish again the CB Plugin. And then let`s see if it still works correct after publishing CB Plugin ;)

=====

Re:plug_cb_PURPS_mystats

Posted by Tinker - 2008/10/08 15:22

Not sure if this has anything to do with Tina's problem but I was just notified by a user of a challenge not being counted via the cb tab.

the link generated via the component looks like this:

http://www.xxx.com/index.php?option=com_purps&Itemid=88889056&tip=rock&go=1&act=challenge&submit=submit&user=BundyRed

while the link from the cb tab looks like this:

http://www.xxx.com/index.php?option=com_purps&tip=rock&go=1&act=challenge&submit=submit&user=BundyRed&Itemid=1000114

notice the itemid in the wrong place and incorrect value (keeping the default and not the entered id)

Can this cause the challenge not counted issue?

I'm also having a when a user can not send a challenge due to a pending one existing even though there isn't an active challenge listed in the database.

=====

Re:plug_cb_PURPS_mystats

Posted by steveometer - 2008/10/08 15:47

i get the same issue, i have a few open contests that have no 2nd username

of course, i would say using userid is better, its too easy to get a username that could conflict with sef url and all that

SoM

=====

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/08 19:31

hi
ok thanks guys

Tinker said:

notice the itemid in the wrong place and incorrect value (keeping the default and not the entered id)

thanks tinker, I fixed that bug... the Itemid parameter just work and updates now as it should.

I checked my phpmyadmin in

`jos_purps_active_games`

and I don't have any challenge with any user id missing so I'd say I didn't get this issue

I also noticed that from the purps component page, when you open a new challenge and when having selected the user to challenge you get to a page with a lost Itemid. Can you check?

So I removed the Itemid from the challenge url so it leaves the username at the very end of the url, maybe it is the problem...

Download this new version in the Community downloads.

Steve I agree with you that using userid instead of usernames would probably cause fewer problems

=====

Re:plug_cb_PURPS_mystats

Posted by steveometer - 2008/10/08 20:09

i think thats about the only changes i can see that should affect operation

cahnge url to include userid instead of username

check every link in the component to make sure itemid is used

i had sent pragma a copy that i hacked to use sef calls properly, i can add these changes and send to him

SoM

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/09 04:13

now i am a little confused :S

since adroussel said i am the only one who has a Problem with it ;)

so this Problem is coming from the CB Plugin, right ?

My Datas: joomla 1.0.13 / PURPS / Ajax Notify Checker /

so far no Problems on my PURPS since i unpublished the CB PPlugin. Since 2 Days Members playing it and everything gets counted correct.

If it`s the CB PPlugin, then would it be best to post a fixed CB Plugin (if there is one avaiable) to the Downloads-Area instead of fixing the existing one??

Greetings Tina123 :)

Itemid on the page you select your weapon is not lost but it does get moved to the end of the string.

I've edited your code to match the components(moving the Itemid to after com_purps. so far I've gotten no complaints of non counted challenges from users and the pending game issue also seems to be gone. I'll try and get some more testing done on this later

=====

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/09 09:27

i grabbed the latest CB Plugin, installed it and translated it....published it....

and just saw that it didn't count the Challenges again when i challenged Users from the CB Plugin ;)

For two Days and more than 100 Challegnes it worked perfect without the CB Plugin. First Challenge with the Use of the Plugin and the Challenge didn't get scored.

so same Problem with it like the last one :(

=====

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/09 09:43

yes,
it's easy to check, use phpmyadmin and see in the jos_purps_active_games table if any 'challenged_id' is zero

it's weird but the only zero I found was when I changed the itemmid from the very end to just after com_purps...
So I totally removed the Itemid in the challenge url. Btw, in the component page, my 'your challenge has been sent' page has no itemid:

index.php?option=com_purps&tip=rock&go=1&act=challenge&submit=submit&user=samanthabigtits
and the links below (return to menu...) have no Itemid...
Is it just me? or just joomla 1.5
it seems that that on here, the itemid is not lost...

please j1.5 users let me know if you're loosing itemid or not...

I think your right Tinker, it might be that there must be nothing in the url after the challenged username.

=====

Re:plug_cb_PURPS_mystats

Posted by Tina123 - 2008/10/09 11:05

actual Status:

i have tried last CB Plugin from adrousel without Luck :(

tinker was so kind to send me his modified File and i tried this one too....without Luck :((still unscored Challenges) and i have see that on other Sites the Same Problem appears. So it is not just me :(

So i am really :S with this CB Plugin.....

So far not working for me :(

=====

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/09 21:54

hmm this is really strange

I have the one from the community downloads installed and I'm looking for the bug to happen without luck. I just launched a huge global PURPS attack on my little community using this cb plugin only and haven't been able to reproduce the bug.

for now, every game count total match users lost+win+draw, and no usernames are lost yet. I'm still waiting , maybe it will happen later.

Tinker any update from you?

Please people, if you can
in phpmyadmin, these 2 SQL queries are bug seekers:

Query 1

```
SELECT * FROM `jos_purps_active_games` WHERE `challenged_id` = 0
```

Running this one would list you challenges without challenged username.

Query 2

```
SELECT * FROM `jos_purps_game_results` WHERE `won` + `lost` + `draw` != `allgame`
```

this one would give you a list of users where lost + draw + won is not egal to game total.

If you have anything listed in one ore both this queries, please report here your joomla version and exact usernames (or check if these users have blanks, numbers or capital letters in their username or whatever...).

Hope we can get somewhere ;)

Re:plug_cb_PURPS_mystats

Posted by Tinker - 2008/10/10 02:29

Still playing with this... I've got 5 users with non matching totals myself included. I've sent Tina another file to try out...waiting to hear from her today.

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/15 00:58

after my investigations

The bug doesn't come from the new PURPS cb plugin but I finally found out it comes from people using the component to challenge users and submitting an empty field (the field should be mandatory with an alert) or a mistaken username...

So half of a solution would be to make the username field mandatory but it wouldn't prevent people from making mistakes in usernames. Or using an ajax guessing username like in cb registration, it would help but still won't prevent people from making mistakes.

The full solution would be to use only the cb plugin...

And challenge function from the component could be disabled in parameters. The good thing is it makes people to visit other people's profiles.

What do you think?

Re:plug_cb_PURPS_mystats

Posted by steveometer - 2008/10/15 02:15

i went ahead and changed where it calls the functions to use the userid, but still an ajax or jquery username checker would be nice, esp if then it pops up below the username the weapons

i also agree the temporary solution is to disable the type in challenge and use ONLY the plugin

im gonna do that until the jquery fix comes

SoM

Re:plug_cb_PURPS_mystats

Posted by adroussel - 2008/10/16 05:29

Update!

I added as an option the ability to display the results percentages using the googlechart API as a nice dynamic 3 colors apple pie B)

Demo:

http://www.retromundi.com/index.php?option=com_comprofiler&Itemid=100004&task=userProfile&user=116

I updated the community download so get it there
hope you like it
